Dear Teddy:

It was a pleasure working with you on the development of the Becker Project Resources web site. The work you did was very professional, fast, and wonderfully formatted. You were very responsive to our ideas, requests for change, and suggestions for improvement. Your creative contribution to the site should also be noted. You listened to our high level thoughts and delivered a product that fit very well with the concepts we were trying to articulate.

Overall we were very satisfied with the work studio VISIA did for us. I do not hesitate to highly recommend your services to anyone desiring to create a high-quality, professional web site.

Thank you very much for your help.

Sincerely,

John S. Becker
