December 16, 1998

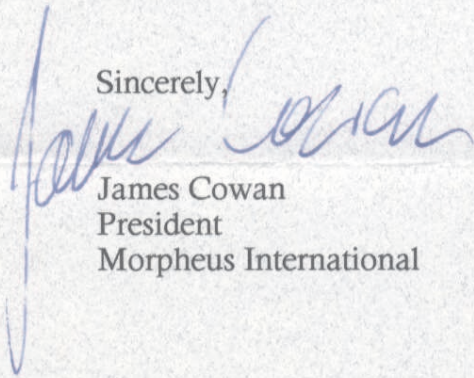

To whom it may concern,

We have been operating our business on the internet for about three years now. Our sites are complex and serve as 'stores' for the sale of our products. In the past, we have had the widespread and frustrating experience of going through a number of 'webmasters' over this period. The problems of unreliability, lack of technical knowledge, and lack of any quality design ability are all too frequent in this field.

It has been a great relief to have come upon Studio Visia. They have been exceptionally creative in their design of our three current sites and have been immediately available to answer any questions, make updates, and deal with any problems that may crop up from a technical standpoint. They are on top of new developments and are always making useful suggestions on improving sales.

I would be happy to verbally reference Studio Visia. We at Morpheus are completely satisfied with their service and are always more than pleased when they work their creative magic on our sites.

Sincerely,

James Cowan
President
Morpheus International
